ANB GO BUSINESS RELEASE NOTES

KEY TAKEAWAYS VERSION 14.0

- Improved search functionality
- Enhanced display for ACH payments
- Expanded messaging for wire approvals and password expiration
- Enhanced same day balance reporting
- Updated statement and loan payment views

IMPROVED SEARCH FUNCTIONALITY

A message will now be displayed to users when a 'Balance & Transaction Reporting' search returns a greater number of transactions than the configured maximum records amount.

> (i) Your search returned more than the maximum records of 9999. Please narrow your search and try again.

ACH ENHANCEMENTS

- Individual payee name to display in the 'Payments' list view for prenote ACH payments initiated with one receiver. Previously, the list view would display the payee name as MULTI.
- ACH sender information will display on the 'View ACH payment' screen for template only users.
- The printable view of an ACH payment containing greater than 3,000 receivers has been updated to display.
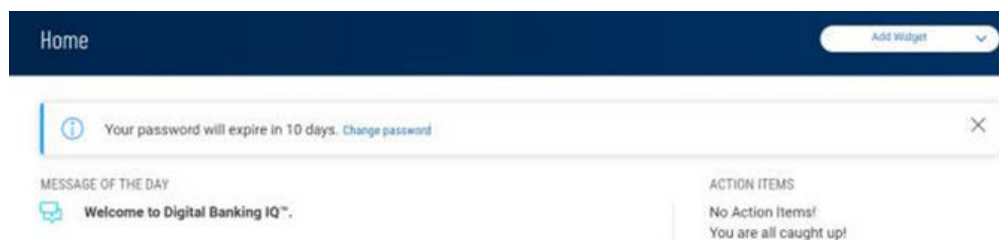

WIRE ENHANCEMENT

Wire approval alerts will now be sent for simplified payments, expedited payments and international wire payments.

PASSWORD IMPROVEMENT

A new password expiration alert message on the 'Home' workspace will prompt users to change their expiring passwords. The alert message will appear each time the user logs in until the password is changed or expires.

Home   Add Widget ∨

(i) Your password will expire in 10 days. Change password   ×

MESSAGE OF THE DAY   ACTION ITEMS

Welcome to Digital Banking IQ™.   No Action Items!
                                            You are all caught up!

REPORTING
Enhanced same day balance reporting to report the current ledger balance.

STATEMENTS
The dropdown fields used in the statement search have been updated to remove the automatic filtering based on the year selected. Clients can now view statements 24 months back.

LOAN PAYMENTS
The loan payment initiate screen is updated to include a view-only transaction date.
